Hello

To who it may concern

I am filing a complaint on my real estate Tax. My 2022 Taxes were \$3,241.48 per yr. My 2023 Taxes were raised to \$5,152.36. Now my 2024 Taxes were raised to 7,178.84. Although we did add a 30x40 building attached to the old house, for me and my wife to live in as we need help on the farm, so the younger people can move in the big house to go on with the farming and such. This Building was appraised at around \$170,000.00 which is way out of hand to my thinking. This building is attached to the old house and goes with the farm and has no resale value.

It has no in door bathroom or electric and single single pain windows only. Could these Taxes be brought to a more suitable level??

Please consider the younger people trying to pay for the farm plus paying Taxes like this.

I Thank you in advance for your time and consideration

Sincerely
Just
